Svetlana Sitdikova

Project Manager · 6 years of experience

The Hague, Netherlands • +31 6 47 77 39 00 • svetlanasitdikova.nl@gmail.com • linkedin.com/in/svetlana-sitdikova

---

Project Manager with experience leading engineering teams, driving delivery in fast-paced environments, and managing complex cross-team initiatives. Experienced in both enterprise-level product development and digital agencies, delivering full-cycle products and scaling processes for distributed teams.

As a Project Manager, managed 6 different projects and led teams of 12–20 people. As a Delivery Manager, oversaw six distributed teams (60+ specialists) within a large product organization. Scaled engineering teams from 35 to 63 members, hired and mentored five project managers, and reduced landing page time-to-market from 2 weeks to 1 day.

Structured and independent, with strong experience in multi-vendor, multi-team environments. Focused on predictable delivery, transparent communication, and healthy team dynamics.

Skills

- **Background in:** e-commerce, fintech, real estate platforms, CMS, B2B software
- **Expertise:** Agile frameworks (Scrum, Kanban, LeSS), Waterfall; Software Development Life Cycle (SDLC); Project Delivery, Incident Management, Release Management, Risk & Dependency Management, Stakeholder Management
- **Technical domains:** Web Development, Databases & SQL, ETL, Kafka, API Integrations, CI/CD, Performance Optimization, Monitoring
- **Tools:** Confluence, Jira, Figma, Miro, Notion, Draw.io, Smartsheet, Productboard
- **Languages:** English, Russian

Experience

Andersen (IT Consulting & Software Development) • Project Manager

Apr 2026–Present

Andersen is an international software development company (Warsaw HQ, with development centers in Europe) providing custom software engineering, IT consulting, and dedicated development teams to clients across various industries.

Currently engaged in a long-term client project for an international transaction-processing and billing platform serving the aviation and business travel sectors. The platform provides payment processing, billing, settlement, and reporting solutions.

- **Team leadership**: Lead one of four engineering teams, a 12-person database team, coordinating multiple parallel technical initiatives across database development, migration, maintenance, and performance optimization.
- **Delivery process:** Introduced sprint-based planning, prioritization, and delivery tracking to improve team visibility.
- **Cross-team coordination:** Align dependencies and delivery timelines between the database team and UI/application development teams to ensure database changes, data migration, and related UI functionality were delivered consistently.
- **Technical initiatives:** Led a migration from legacy databases to a centralized data warehouse, coordinating database engineers, developers, and QA across preparation, testing, release, and post-release activities. The migration improved average performance by 65%.

Samolet (PropTech) • Delivery Manager

Sep 2023–Feb 2026

One of Russia's largest real estate developers, building its own digital platforms that automate the full cycle of online sales and client interaction, including a high-load website (5M MAU), a customer account platform with online apartment purchase, and internal B2B and CMS tools.

- **Organizational leadership:** Coordinated 6 distributed teams (63 specialists: engineering, design, project managers) across multiple parallel initiatives in a multi-vendor environment with an outstaff team of 4 contractors.
- **People management:** Led the team’s growth from 35 to 63 members while scaling processes accordingly. Hired and onboarded 5 project managers, acting as their direct manager – mentoring and supporting them in leading teams.

- **Incident management:** Reduced mean time to resolution (MTTR) for incidents and production issues to 1–2 days and cut the number of CRM integration bugs from ~300 to <30 per month. Improved incident management by implementing classification, prioritization, Kanban, automated dashboards, and standardized procedures.
- **Release management:** Facilitated delivery across multiple teams within a Large-Scale Scrum framework (LeSS). Streamlined regular releases (once a week, once per sprint) for a high-load website. Introduced a release calendar, guidelines, and new roles.
- **Team coordination:** Alongside cross-team coordination, directly managed one of the six development teams (4 developers, tech lead, and QA engineer), focusing on technical initiatives and optimization.
- **Landing page automation:** Accelerated launch time of new pages from 2 weeks to 1 day. Initiated a new project – a no-code builder for creating website landing pages, assembled and managed the development team. This accelerated the rollout of client services and marketing campaigns.
- **Website performance optimization:** Led an initiative to improve site performance, reducing page load times from ~7 to <3 seconds, improving user experience and SEO. Migrated key pages from Vue 2 to Nuxt 3, implemented CDN and caching, and optimized backend requests.

IDA Project (Digital agency) • Project Manager

Nov 2020–Aug 2023

Digital agency delivering outsourcing and outstaffing services for real estate clients, offering end-to-end support from business analysis and UX/UI research to development, covering websites, marketplaces, client/agent portals, and online transactions.

- **Team leadership:** Managed 1–3 engineering teams (up to 20 people, with backend and frontend scope). Facilitated Agile ceremonies (stand-ups, sprint planning, retrospectives, reviews), monitored progress and timelines, resolved blockers, and ensured sprint delivery.
- **Project delivery:** Led end-to-end delivery of 5 projects, including new website builds from scratch and long-term platform support. Drove new feature rollouts, UI/UX improvements, integrations, and monitoring.
- **Stakeholder management:** Acted as the main contact between clients and the internal team. Communicated with stakeholders (product managers, C-level executives), external vendors, and internal client teams (CRM, SEO, marketing, sales, finance, legal). Maintained high client satisfaction (CSAT) at 8.9/10 across monthly client surveys.
- **Budget management:** Coordinated financial processes with the clients and ensured project profitability (hourly rates, team salaries). Revised the hourly billing approach for one client, increasing profitability by 30%.
- **Product collaboration:** Worked with the product backlog and collaborated closely with the product manager. Contributed to product growth: participated in UX research, launched A/B tests, and worked with analytics tools.

Earlier Experience • QA, Lawyer

- **QA Engineer (IDA Project)** Mar 2020–Oct 2020
  Performed manual testing of web applications (UI/UX testing, cross-browser compatibility).
- **Lawyer (Tenzor Consulting Group, Legal Expert)** 2016–2020
  Represented clients in court proceedings and handled contract drafting, review, and legal documentation.

Education

- Leading SAFe, SAFe Release Train Engineer – Andersen (Internal Training Program) 2026
- Agile with Atlassian Jira – Coursera 2023
- Agile Methodologies – GeekBrains 2020
- Product Manager Program – GeekBrains 2020
- Bachelor & Master in Law, South Ural State University 2011–2017
